NO to Pears! They should have never been released to the public and are now on the invasive species list. They are genetic hybrids with MANY problems. Just say no to them as well as Colorado Blue Spruce! Yes the Japanese Lilac is the same as Ivory Silk Tree Lilac and is a nice tree for our soil and climate

Scott presented the name of another tree service when we have to remove trees. Veneer Tree Service 216-956-8149

Motion to adjourn at 7:45 by Ashlee second by Scott all year
